Python, C/C++

Education

2012.9–2015.4 **Masters** of Computer Science

XiDian University

Scheduling on Cloud Platform

Mainly engaged in allocation of resources on computing platform, such as the virtual machine resource allocations, virtual machine placement policies, the allocation of resources for tasks and task execution order and other related research.

2008.9–2012.7 **Bachelor** of Computer Science

XiDian University

Specialization in Computer Science and won the scholarship many times

Project

2013.9–Now

Electromagnetic Collaborative Cloud Computing Platform

XiDian University

Develop automated deployment of electromagnetic calculation on the Open-Stack platform with OpenMPI, which supports dynamic deployment, reasonable resource scheduling, live migration and disaster recovery.

Detailed duty:

- Responsible for the system design.
- Research on cloud computing platform for resource and task scheduling.
- Responsible for the overall preparation of background task processing system.

Including:

- In server, database design and the server programming.
- In client, receive server control commands and returns the execution status.
- Process input/output file transmission as well as the design of service interfaces.

2014.3–2014.5 **Traffic Data Collection Project**

XiDian University

On this project we use the API of the camera on the traffic light to get the car passing by information. We write receiving and storage system to handle large photos taken by the camera of the traffic lights. We improve the sending and receiving capability of original systems by a factor of 5 times.

Detailed duty:

- Responsible for receiving program and database services program design.
- Multi-Thread processing the photo collected by the camera in the server side.

2013.8–2013.11 **iXiangche**

iXiangche Team

iXiangche is a positioning in the car "after buying service" Internet platform in the market. Integrating offline car service shops sources, targeting the local majority of car owners, provide cost-effective car services.

Detailed duty:

- Responsible for user login module coding.
- Responsible for the back-end database and the vendors and users the back-end server coding.

Experience

- 2014.7–2014.9 **CSDN Open Source Campus** CSDN
Memcached performance optimization problem and currently study the issue and solutions.
- 2013.5 **Yahoo BeiJing Hackday On–Site Final** Yahoo, BeiJing
Write mobile application "AiYou" which records the user's trip Photos, locations and other information. Personally responsible for cell phone background processing.
- 2013.3–2014.5 **Microsoft Imagine Cup** XiDian University
Write mobile reading software "ReadOne" which collects online material to provide users to read, mainly responsible for the recommendation algorithm and user ranking algorithm.
- 2012.9 **Tencent Hackday On–Site Final** Tencent ShenZhen
Write mobile applications "street comment" which gets street view by the mobile phone camera Lenses, and display other user's comments on top of the street view. Personally responsible for performing background processing.
- 2011.7–2011.9 **Internship** Alibaba Inc
Internships in Taobao. Mainly responsible for internal data analysis site Pecker.
- 2011.5–2011.6 **MiniSQL Interpreter** XiDian University
Based on the lex and yacc makes a SQL language interpreter with C, implements a simple analysis and SQL syntax and storage implementation. Individuals responsible for lexical analysis, syntax analysis and syntax tree construction.

Communication skills

- 2012.9 **The MSTC of Xidian** XiDian University
Be an member of the MSTC club of Tech Department of the postgraduate and become technical experts in the next year.
- 2012.9 **The Tencent Innovation Club** XiDian University
Be an member of the Tencent innovation club of Tech Department.
- 2009.9 **The MSTC of Xidian** XiDian University
Be an member of the MSTC club of Tech Department of the undergraduate.

Awards

2013	Best Software Award "Smart Router", mainly add a web server on the router to provide Internet access, equipment control features, personal primarily responsible for background processing	XiDian SSTA Hackday
2013	Postgraduate Scholarship The First Prize Scholarship for the second year of master.	XiDian University
2012	Gold Award Tencent Q robot speech robot application development, and write the corresponding machine feedback for the voice input, final software "bai bian xiao dai" won the Gold Award.	Tencent Q robot Competition
2012	Postgraduate Scholarship The First Prize Scholarship for the first year of master.	XiDian University
2011	Bronze Medal The 2011 ShangHai ACM/ICPC on-site Regional.	Asia ACM/ICPC Regional
2011	Bronze Medal The 2011 BeiJing ACM/ICPC on-site Regional.	Asia ACM/ICPC Regional
2011	Undergraduate Scholarship The First Prize Scholarship for the senior.	XiDian University
2010	Bronze Medal The 2011 TianJin ACM/ICPC on-site Regional.	Asia ACM/ICPC Regional
2010	Undergraduate Scholarship The Second Prize Scholarship for the junior.	XiDian University
2010	First Prize Xidian University Programming Competition and the contest of the selection of the XiDian University ACM team.	The Programming Competition Of XiDian University
2010	Second Prize Xidian University Mathematical Modeling Competition and the contest of the selection of the XiDian University Mathematical Modeling team.	The Mathematical Modeling Competition Of XiDian University
2009	Undergraduate Scholarship The Second Prize Scholarship for the second year student.	XiDian University
2008	Undergraduate Scholarship The Second Prize Scholarship for the freshman.	XiDian University
